Speaker's Bio

Julia Kurps, Ph.D

**Team Lead - Real World Data
The Hyve**

Before joining The Hyve in 2016, Julia obtained her Ph.D. in Neuroscience at the Free University of Amsterdam. She started in a business analysis role, with the goal of aligning requirements of partners and customers with developments on open-source software stacks.

Since the beginning of 2019, Julia leads the Real World Data team at The Hyve, focusing on coordinating diverse and multidisciplinary teams around two products: RADAR-base and OHDSI. Important aspects of her role are design and implementation of processes, alignment of expectations and tasks of different roles and ensuring personal growth of team members.

The Hyve

The Hyve is an international company based in Utrecht, The Netherlands, that specializes in support for open-source software for bioinformatics and translational research software, including cBioPortal, Open Targets, RADAR-base and OHDSI. The Hyve enables open science by developing and implementing open source solutions and FAIRifying data in life sciences.
