

Outcome of the IHI JU Science and Innovation Panel on ideas submitted for potential IHI topics

Reference number of the idea: N° TI_001277

From Lab to Life: Driving Innovation in Reproductive Medicine

Overall opinion

Although addressing infertility is interesting and important from a public health perspective, the scientific and technological challenges are not clearly formulated in the submitted idea. The link between infertility, diabetes and the expected potential societal benefit are not sufficiently described. In addition, the idea does not clearly explain why it should become an IHI call topic and does not sufficiently demonstrate the overall added value as compared to existing initiatives in this field.

At present, the currently formulated idea is not yet mature for obtaining a favourable opinion from the SIP.
